

IMAGING THE GUT LAYERS

MARCH 30th | 31st, 2020

Humanitas Research Hospital
Rozzano, Milano

After attending this Centre of Excellence meeting, attendees should be able to:

- Reflect on the use of non-invasive imaging modalities such as magnetic resonance imaging and ultrasonography in the management of patients with Crohn's disease and ulcerative colitis (UC)
- Integrate theoretical knowledge of ultrasonography through live inflammatory bowel disease (IBD) cases and discussions
- Analyse the use of histology and histopathology in UC management
- Describe and apply a treat-to-target approach to clinical cases in IBD
